

~~_____~~

For feedback on writing, it would be helpful to have specific things pointed out that I need to work on to become a better writer in Italian. For example:

"Vary ~~the~~ your sentence structure or length."

~~the~~ "Split this paragraph, and develop each idea more."

"Be careful with your tenses," ~~for as writing the~~

Writing Feedback

- Hand writing is a bit of an issue but not too bad
- Clearer comments about specific changes we should make
- Comments about recurring issues
- Pointing out specific words Italians say things if we are saying something incorrectly

- Examples for clearer written feedback...

- How can we make our content grade higher in the tema? What would constitute a greater degree of content?

I think so far the feedback is very helpful
and also that you offer the chance for additional
feedback at many different points. I think for the
"temi" it would be helpful to maybe include a
little bit more about what we are missing
so we can be more aware of that for following
writings (or the corrections)

For the tema, some of the abbreviations for the corrections that need to be made are hard to figure out the meaning of. Also, comments on how to improve the content of the tema would be helpful (i.e. should I add more detail? examples?)
